DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-5, 8, 14, 15, 17, 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Wung et al. (US 6,137,260). The reference discloses a multiple connecting pods connected through a plurality of interlocks. Each pod 32 has identical interlocks 34, 36 on either side of the pod. The interlocks have recesses and also function as electrical connectors. See figure 3.

Claims 9, 13, 22 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Roberts (US 5,900,715). The reference discloses a plurality of pods 12 interlock with each other and are flushed with each other. Furthermore, each pod is independently powered through the power strip 26. See figure 1.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2838

Claims 2, 6, 7, 10-12, 16, 18, 23 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wung (US 6,137,260) or Roberts (US 5,900,715). The reference does not disclose a tab nor hair trimmer. It is a common knowledge to provide the connectors with tabs so that insertion can be accurately guided to its counterpart. It would have been obvious to one having ordinary skill in the art to have provided the interlocks with tabs so that they can be easily inserted into each other. Furthermore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have applied the device to a hair trimmer, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Response to Arguments

Applicant's arguments with respect to claims 1-25 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2838

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
